

Case Study

Digitization for Northgate Markets to Automate Its Ordering Process

Streamlined and Improved Inventory Related Operations

Time-consuming manual process involved for ordering and inventory work

Struggling with the offline process of capturing inventory and placing orders to various vendors

Huge manual effort involved in creating vendor wise delivery schedules and tracking related orders

Greater risk of losing information and hard to manage missed orders

Built a mobility solution to ensure streamlined ordering and paperless management of inventory with offline and online access

Developed tablet-specific responsive UI and functionalities to simplify administrative control, order review, service desk, and supervising process

Migrated legacy data to the new system as per the business rules

Store-wise access and IP-wise access to person

Zend Framework

AWS

Apigility

Android

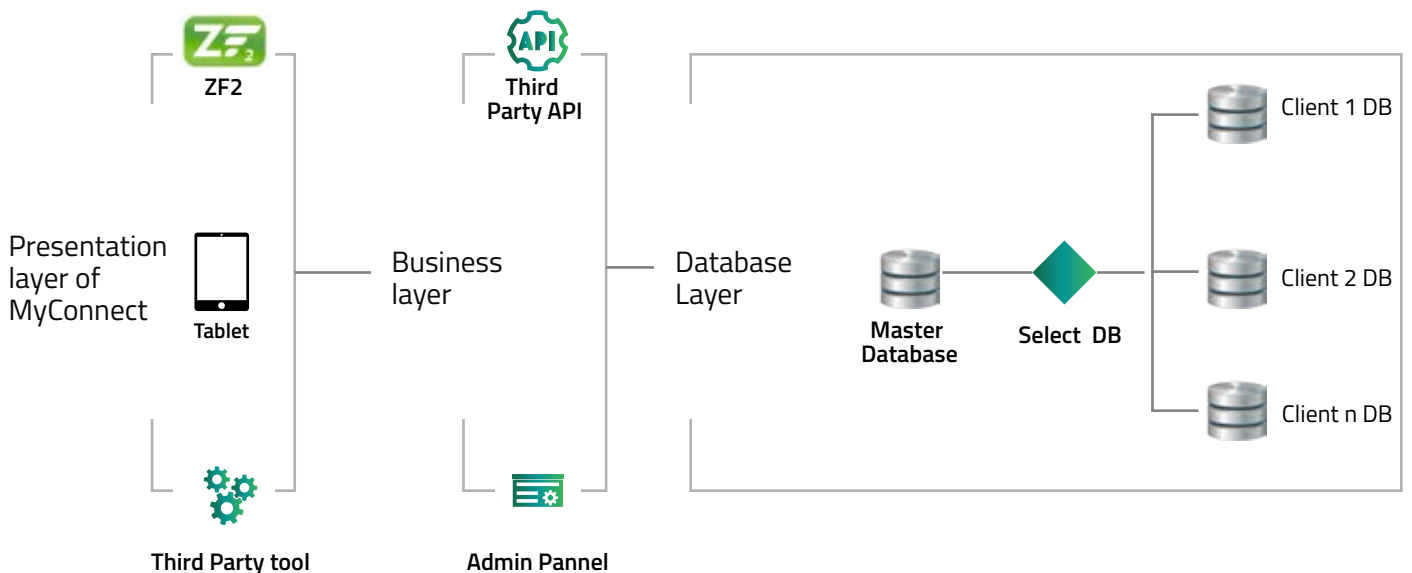

Automated inventory process now gives better insights into product quantities, ensures accurate matching to the order list

Reduced duplication efforts and minimized inventory errors

More accurate ordering decision making and enhanced inventory turns in the distribution centers

Economic gain in terms of time and money
