Support for BACnet:

Product / Services companies

Happiest Minds 360˚IoT Play

associated equipments. and air-conditioning control (HVAC), as well as in lighting control, access control and fire detection systems and their

BACnet allows communication of building automation and control systems for applications in heating, ventilating

BACnet is a non-proprietary and open communication protocol for building automation and control networks.

Support for BACnet:

Scope of IoT applications in Smart Buildings

Critical areas where Building Automation solutions can be built

6 applications of IoT for Building Automation by 2025

6lowPAN and Zigbee. Bluetooth, RFID, Wi-Fi, GSM,

Automation would be

Smart Buildings and Smart home

which will dominate the market of

There are currently more than 1.1

Air Quality

Indoor

Smoke Control

and Building Optimization

Fault Monitoring & Detection

part in Building Automation with

Verticle Applications

Vertical Domain Expertise

Re-engineering and Optimization

Native Mobile App creation

Easy data Import/Export

Cross Platform Support

Multiple Protocol Support

RESTful APIs

Business Intelligence

Mashup Builder

Big Data Support

Device Vendor agnostic

Multi-tenant Architecture

Open Platform Architecture

Engagement Models for Product / Service companies
