HAPPIEST MINDS CREATES AN INTERACTIVE SCORING TOOL FOR UK HEALTH CARE PROFESSIONALS TO HELP RHEUMATOLOGY PATIENTS FIGHT COVID

The coronavirus outbreak has been a global issue affecting millions of people with varying severity. Of concern, patients with rheumatic diseases taking complex disease modifying drugs have been thought to be particularly susceptible and that has led to an urgent effort to identify those patients most at risk. National societies such as the British Society of Rheumatology have produced guidance to help identify these patients.

[VIEW GUIDE](#)

However, the guidance has proved difficult for clinicians and patients to follow and digitisation of the pathway was required to allow a simpler step by step approach to minimise the chance of error. I therefore approached Happiest Minds to help me achieve this task. Working with Happiest Minds has been a pleasure. The work was completed to an extremely high standard and delivered in a timely fashion. This work will now enable clinicians and patients recognise those most at risk from getting COVID-19 and therefore help to minimise the global burden of the disease.

Dr Raj Sengupta

Consultant Rheumatologist,
Rheumatology Clinical Lead and
Lead Consultant for Axial
Spondyloarthritis
