

Application On-Boarding (P2V Migration) to Cloud for a UK Based Global ICT Provider

BUSINESS REQUIREMENT

To setup a cloud environment and onboard applications from end-users / enterprise data centers

Migration to a common platform with different hypervisors, version upgrades

Standardize all core infrastructure server builds

OUR SOLUTIONS

Standardized the core infrastructure on virtual machines

Developed standard build for AD, SCCM, Exchange, DPM, MS SQL; image creation for server build

High availability setup for critical servers

Automated pre-assessment and information gathering; controlled change processes; templated P2V migration process

BUSINESS IMPACT

Standardized core infrastructure across locations

Controlled server builds, security and patch management

Expert team with skills in multiple hypervisors; well documented procedures

Minimal downtime
