CLOUD ASSESSMENT AND TCO DETERMINATION

Total Cost of Ownership for migrating to Cloud is one of the most critical inputs for Cloud Migration decision making process. Migration can be an expensive process due to the various cost models available in the Cloud. At Happiest Minds, we work very closely with the Application and Infrastructure Teams, understand the landscape in detail, business goals and rationale for Cloud Migration and perform a thorough analysis to come up with the Total Cost of Ownership for moving the Infrastructure and Application to the Cloud.

APPLICATION MIGRATION TO CLOUD

One the biggest challenges the enterprises have been dealing with is the migration of legacy applications to the Cloud. Most of these applications run on heterogeneous infrastructures and operating systems and have been optimized for those environments. Migrating them to the cloud just by doing Lift-And-Shift may not be the best solution as those applications might fail to take advantage of the benefits that the Cloud Platform offers. Therefore, most of these applications need to be re-designed or re-architected to run optimally on the Cloud. We use some of the Industry best practices, to ensure that when applications are migrated, enterprises leverage the full benefits of the Cloud.

BUILDING CLOUD NATIVE APPLICATIONS

Leveraging the Cloud Native features, and the functionalities that the PaaS components provide in the cloud can help build rich functionalities in the Applications. Some of the examples are Serverless Architectures, Analytics and Conversational Interfaces. Our Team of Cloud Developers and Architects ensure that the requirements are well understood and an Architecture & Design of the Application is arrived at, leveraging the Cloud Native features of the platform.

OUR SERVICE CATALOGUE

ASSESSMENT & ADVISORY

- Cloud Maturity Model
- Profiling & Runtime Management
- Portfolio Analysis
- Cloud Pricing & ROI - Business Case
- Security - Application & Data
- Behavior Analysis of Websites

TRANSFORMATION & MIGRATION

- Migrate Applications
- Integrate Applications
- Greenfield Development
- Proof of Concept
- Devops
- Monitoring
- Orchestration
- Metering
- Automation
- Self-Service

SUSTENANCE & OPTIMIZATION

- Managed Services
- Augmented Cloud Capacity
- Transformation Projects
- Optimize Cost
