AWS IoT
Infrastructure Automation

For a US based
Water Treatment Company

01 Strategy and Objectives

○ IoT-focused investments to grow and support to partner ecosystem

○ Build a smart solution for water softener products

○ Deploy the Serverless architecture for scalability and availability

02 Value Chain

- AWS IoT services
- One Click Infra Provisioning
- Serverless
- Automation and DevOps
- Build and Deployment

03 Enablers

- Quick understanding of architecture and provisioning of secured end to end Infrastructure using AWS cloud formation
- Serverless deployment model
- AWS code pipeline to deploy the service using DevOps strategy

04 Digital Capital Delivered

IoT Technology & Platform Adoption and Deployment

Reduced Deployment of Infrastructure from Weeks to Minutes

Operational Efficiencies from Serverless Framework and DevOps Methodologies
