Production monitoring system

Business Output

Real Time Operational Visibility to build a **Factory of the Future**

Common platform for the Central Operations team to continuously monitor critical assets and workforce in oil and gas plants

Business Output Asset Monitoring and Human Safety

Create a end-to-end solution for tracking and monitoring ground refueling pumps/trucks at the airports.

Business Output Intelligent Supply Chain

Connect product Innovation and Common Platform for managing IoT water products (Pumps, filters, valves etc)

Business Output

Enable **product as a service** and deliver value to larger eco system.

Centralised Operations and Maintenance platform based on Al/ML and IOT implementation for fossil plants

Business Output

Digital Transformation to optimize field force operation and enrich asset monitoring

Centralised Operations and Maintenance platform based on AI/ML and IOT implementation for fossil plants

Business Output
