

Virtual CISO as a Service

Achieve robust vision, strategy and Cybersecurity program for your enterprise

Overview

Security breaches are increasing, and cybercriminals are increasingly hacking companies of all sizes. The **security** of your organization's assets is important and having proper guidance and executive leadership in a role to manage this process is vital. The issue of hiring a full-time CISO can be both expensive and exhaustive, given the limited access to **cybersecurity** experts in the market today. To bridge this gap, Happiest Minds Technologies, a digital transformation and **infrastructure** security company, introduces its Virtual Chief Information Security Officer (vCISO) as a service.

With our **vCISO** program, you will have access to a pool of seasoned cybersecurity practitioner who will fill the role of a Chief Information Security Officer (CISO) in your organization and business. With the help of this program, your organization will be equipped with the leadership and skill of a CISO who will define the vision, strategy and cybersecurity program to ensure your organizations information assets and technology protection.

Virtual CISO (vCISO) Benefits

1

Provide leadership on risk, governance, Incident response, Disaster recovery & Business continuity

2

Provide Expert assessment on security threats, risks compliance

3
