Identity Vigil 2.0
Powered by onelogin
by ONE IDENTITY

Trusted & Proven Worldwide

The Global Identity as a service market is projected to grow from $4.92 billion in 2022 to $23.88 billion by 2029, exhibiting a CAGR of 25.3%. – **Fortune Business Insights**

Today's complex business challenges demand the right Identity solution that can leverage the power of cloud computing and adaptive authentication to enhance business processes.

Factors driving the demand for Cloud-based Identity Solutions

01 A fast-paced digital shift

02 Storage of personal and sensitive data on Cloud platform

03 Protecting data integrity that impacts business growth

04 Data security risk that threatens organizational assets & infrastructure

05 Global data privacy compliance and mandates

06 Security risks associated with data stored on public Cloud

A Robust Cloud-Based Identity Solution (IDaaS) is a must - Hence Identity Vigil 2.0 powered by Onelogin

Key Features

01 Deliver access services efficiently & cost-effectively

- Single portal access to business-critical applications
- One secure password for all applications
- Social login as a means of SSO
- Desktop SSO with Seamless access from Macs & PCs
- Simple SSO experience to access Windows servers wherever they are
- RADIUS endpoint for user authentication to securely connect to VPN or WiFi
- Unified Directory Service

02 AI driven Adaptive MFA

- Layered Multi-Factor Authentication across the enterprise ecosystem: SaaS, On-prem, custom apps, cloud infra, VPN, WIFI
- Nextgen MFA that is Password-less & context aware
- Prevention of Identify theft anomalous behavior pattern detections: user info, location, device , frequent apps, time-of day, etc.
- AI driven risk score that enforces additional layers of MFA
- API Security

03 Access Management & UCLM (User Life Cycle Management from the Cloud)

- On-prem SSO using 'Access'- bridge between all cloud & on-prem apps
- Same level of security across on-prem and cloud apps RD Gateway & Web Access - Secure remote access to
- Windows servers and desktops across on-prem / data centers & private clouds
- Flexible and entitlement driven Role-based access control
- Active Directory sync in real-time
- Risk aware Contextual access management
- Consumer IAM

04 One stop IAM

- Onboarding to ongoing support – all in one package
- Flexible pricing and support models
- Overall engagement governance
- L1, l2, L3 support options
- Flexible support hours
- No hassles of application refactoring / version management / upgrades
- Priority ticket support 24*7
- Periodic performance / status reports

Our Value Proposition

Robust IAM
01
- Secure and centralized applications, devices, and end-users accesses all-in-one place
- Cloud-based & Multi-tenant Architecture
- Analytics & Intelligence
- AD integration & access

Accelerated IAM Adoption
02
- True IDaaS solution
- Strategic planning and Solution Design
- High User Adoption
- Built-in redundancy

Identity Vigil 2.0
(IDaaS)
Powered by
onelogin
by ONE IDENTITY

Scalable & Flexible
03
- Easy Setup
- Ease of Doing Business
- Ease-of-Development through certified consultants
- Bundled subscription services for SSO MFA & IAM
- Competitive Pricing, best fit for SMB's

One Stop Shop
04
- One stop service - Hosting, Implementation & on-going support
- End to End accountability
- Flexible BAU Support options
- Automation for Operational Efficiency
- Highly scalable, extendable & agile

SSO& MFA	Contextual Access Management	Unified Directory Service	Identity Lifecycle Management
API Security	Desktop SSO — Risk Scoring	Consumer IAM	Reporting & Intelligence
